

Radial Rift-Sawn
**White
Oak**
Quercus Alba

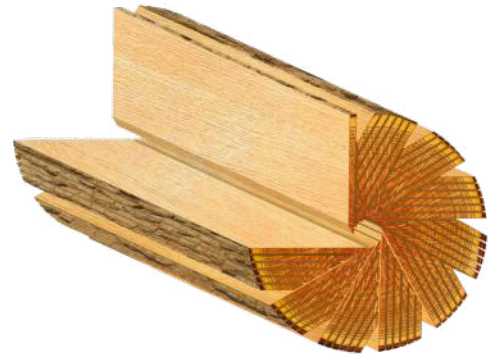

**QUARTER-SAWN
FLOORING, INC.**

Manufacturer of the
**Clearest Grades and
Perfect Grain**

We're your rift experts

We invented radial rift technology. It allows us to maintain a tighter, more consistent grain structure across the width of wider boards than all other sawmilling technologies. This is only available from Quarter-Sawn Flooring, Inc.

Our radial rift-sawn grain white oak flooring starts from hand selected veneer grade logs — a quality of log so high that no other manufacturer uses this grade of log. These logs are further inspected for uniformity in color, grain and diameter. We use only true Quercus alba, true “Northern White Oak”, not the commonly included species of Burr Oak, Chestnut Oak, Chinkapin Oak, Live Oak, and Post Oak. From these logs, we only use those in the midrange of the Quercus alba species color spectrum.

Selected for the headquarters of Under Armour

- Grade: Exceeds NWFA/ NOFMA's Clear standard
- 100% Heart Wood (sapwood removed)
- Vertical grain structure of 30 - 80° (depending on log's medullary rays)
- Grade: Exceeds NWFA/ NOFMA's Rift-Sawn standard
- Long lengths: 30" to 12' lengths averaging over 5' per board (longer by request).
- Width: 4", 5" & 6" (special order widths available)
- 3/4" thickness, other thicknesses available (1/2", 5/8" & full 1" by use of other plywood thicknesses)
- Tongue & grooved, end matched & relief bottoms to NOFMA standards
- Moisture content of 7% to 9% unless otherwise specified
- Finish: Unfinished or optional pre-finishes (Hard Wax Oil or 100% solids UV cured Aluminum Oxide)
- Construction: Industry leading full 12-ply engineered construction featuring 15mm exterior grade, CARB compliant premium Russian Baltic Birch with a 4.5mm thick wear layer
- SK-8 Glue (designed for wooden skateboards)
- Cold Press clamping for a sure bond
- Edge Treatments: Square, microbevel (mini or micro) and rolled (rounded).
